

the outdoor classroom

preparation for your visit:

how to use these resources

These resources are divided into several sections:

- Contents listings
- Background information
- Work Sheets for Key Stage 1
- Teachers Sheets for Key Stage 2
- Blank Work Sheets, blank maps, colouring pictures, etc.
- Photographs

It is hoped that the resources will be used to give ideas and guidance to teachers who would like to teach a number of subjects in a local out door setting. Many of the Key Stage 2 sheets suggest follow up activities that could be carried out in a classroom setting.

There is also a list of additional resources provided by other organisations that could be used to supplement the resources has been provided.

Many of the Key Stage 1 sheets can be used as an introduction to Key Stage 2 classes and many of the Teachers sheets designed for Key Stage 2 have included activities that could be used for Key Stage 1.

The blank work sheets and maps are specific to these resources and are referred to in the introduction of each sheet.

The worksheets cover curriculum topics but do not make specific reference to the National Curriculum. The sheets are intended to supplement and back up work carried out in class.
